

CHEILOU MARIE PURO

Computer Science Student

github: prchlmrie | email: cheilou.dev@gmail.com

ABOUT

I'm a CS student focused on backend development, with experience in Python, FastAPI, and full-stack system design. I enjoy building AI-driven solutions and scalable backends. I've participated in multiple hackathons, and developed production-ready systems with external API integrations.

EDUCATION

Lyceum of the Philippine University Cavite

Bachelor's Degree in Computer Science

Expected Graduation: 2027

TECHNICAL SKILLS

Languages: Python, PHP, Dart

Data Science: NumPy, Pandas, NLTK, Jupyter Notebook

DevOps: Git, GitHub

Database: MySQL, MongoDB, SQLite, Firebase

Frameworks: FastAPI, Tkinter, Flutter, React, React Native

Frontend: HTML, CSS, JavaScript

AI/ML & APIs: Google Gemini, OpenAI, NVIDIA API

IDE: VS Code, Android Studio, Cursor

CERTIFICATES

IT Specialist - Database

Certiport - A Pearson VUE Business

May 2025

Completion of CS50SQL, including seven problem sets, and one final project.

Harvard OCW, January 2025

Completion of CS50P, including nine problem sets, and one final project.

Harvard OCW, January 2025

Completion of CS50x, including ten problem sets, nine labs and one final project.

Harvard OCW, March 2024

8-hour Training in

"Data Science & Data Analytics with Big Data"

MSTCONNECT PH, December 2023

PROJECTS

Pirates Way Finder

A comprehensive indoor navigation application designed to help users navigate through building floors with accessibility features and intelligent pathfinding.

Tools: Python, FastAPI, MongoDB, Pytest, Git

TrendPulse

An AI-powered trend detection system that analyzes online data to identify emerging trends and recommend products that small vendors should sell before the trend peaks.

Tools: Python, FastAPI, MongoDB, OpenAI, ChromaDB, Pytest, Git

EtherFlow

A real-time cryptocurrency volume anomaly detector with candlestick visualization and terminal-style dashboard for tracking blockchain market anomalies.

Tools: JavaScript, D3.js, HTML, CSS, Binance WebSocket API, Git

FLECS

A unified web-based system that integrates point-of-sale, inventory management, and demand-driven restocking for independent retailers.

Tools: Python, Flask, React, SQLite, JavaScript, Axios, Recharts, Git
